KOLBERG MAKES MORE OF YOUR MUNICIPAL HALL

Equipping a municipal hall perfectly for musical purposes can turn into a complex challenge, especially if you need to host small ensembles as well as large symphony orchestras. Adequate seating, in particular, is of increasing importance to orchestras and is often taken for granted. For this reason, the purchase of suitable equipment for musical events in your municipal hall should not be neglected.

Kolberg has long been among the leading manufacturers of orchestra equipment and percussion instruments. Our clients include almost all major German and international symphony orchestras and opera houses all over the world, as well as many cities and municipalities with municipal halls. We are musicians ourselves and work closely with our customers. Therefore we know the requirements of an orchestra with concert activity very well. That is why we are your ideal contact for all questions concerning orchestra equipment.

Palau de les Arts Reina Sofia, Valencia

Bolshoi Theatre, Moscow

In order to provide you with an overview, we have compiled a basic package for you that perfectly prepares you for most musical events in your hall. The listed supplementary packages provide a quick overview of how you can extend the basic equipment according to your requirements. The transport cart package, for example, allows you to move and store your chairs and desks comfortably and conveniently.

Functional – expedient – sturdy:

We put the greatest emphasis on this. Our hands-on approach takes health-related aspects such as ergonomically correct sitting into account, as well as appropriate lighting for scores and space-saving storage. The longevity of our products is not only a sign of high quality – in the long run this first and foremost means significant cost savings for you.

Individual advice:

Of course we'll be happy to provide you with an individual offer. Simply select your preferred models from our range of chairs, music desks and conductor's stands. You can always find our extensive product range in the internet under www.kolberg.com, or request our extensive catalogue of orchestra equipment.

You would prefer to speak us personally? No problem. We'll be happy to advise you over the phone, or schedule a personal visit. You can personally test every product at our showroom of more than 1,000 square meters – an offer that is regularly taken up by customers from all over the world.

Opéra Garnier, Paris

Teatro alla Scala, Milano

We look
forward to
your visit!

ABOUT US

All Kolberg products are manufactured by our instrument makers and craftsmen, at our own factory at our company's location in UHINGEN near Stuttgart. We consequently have full control over the quality of our products, while being able to quickly respond to customers' requests. State-of-the-art machinery, including CNC-controlled machining centres and two laser cutters, guarantee highest precision. With our commitment to Germany as our production site, we assume responsibility – for our employees and our environment. This results in top products that truly deserve the distinction "Made in Germany". All products that are distinguished by this label are produced according to the stated standards.

Klaus Kolberg, managing director

"Kolberg products are built to the highest standards and satisfy our customers with longevity and top quality."

Should you ever detect a defect in your Kolberg product none the less, call us: We know our products very well and can therefore determine whether a material fault, impeding proper use, is present, for example. In such a case, the Kolberg goodwill takes effect. This is granted beyond the statutory warranty period of two years. Contact us, we will take your concern in hand! Because we manufacture our products ourselves, we generally have all spare parts in stock, and can usually provide them, even after many years. Kolberg products are crafted to the highest standards and is convincing our clients with longevity and top quality.

We attach great importance to the use of certified wood from sustainably managed forests. Many of our products are even made from wood grown in our region. We care for the protection of the environment and we take the responsible use of resources for granted.

Only for commercial use.
All prices in this catalogue are quoted strictly net ex factory.
VAT to the legal amount is added.

MUSIC SCHOOL FILUM FILDERSTADT

THE CREATIVE SOLUTION

In collaboration with the music school Filderstadt and the architectural firm ORANGE BLU, Kolberg Percussion has developed a special version of the musicians' chairs in four different colours for the seating configuration. The entire orchestra equipment is from Kolberg as well.

“High quality products,
professional handling,
best service!”
Maria Fiedler, principal

MUSIC SCHOOL FILUM FILDERSTADT

www.musikschule-filderstadt.de

“The uniform interior design of all rooms was of central importance for us. That is why we decided to use comfortable musicians’ chairs, even for the hall’s seating configuration. Regarding the excellent collaboration with Kolberg Percussion, I must emphasise in particular the good advice and smooth processing. We now have a perfectly equipped music school, which we can all enjoy together every day.

Maria Fiedler, principal

Lots of space for music and creativity!

4,000 m² on five levels, a concert hall with eight metres ceiling height and 280 seats, a cafeteria, 22 acoustically optimised classrooms 8 to 100 m² in size and various chamber music and ensemble rooms – FILUM offers versatile development opportunities for the musical collaboration of 3,000 students and 70 teachers.

With FILUM, the architectural firm Wilford Schupp (now ORANGE BLU) designed a building where architecture and music are closely interwoven.

The design of the concert hall – the heart of FILUM – reflects the piano keyboard and its shapes, colours and materials refer to musical instruments. It offers space for 280 guests.

It was ceremonially inaugurated in December 2016.

The music school Filderstadt is a communal educational institution for children, adolescents and adults.

A special version of music chairs was created for the music school Filderstadt in collaboration with the architectural firm ORANGE BLU: a special fabric in four different colours, a wooden backrest with a colour glaze. Seating is furthermore characterised by sturdy row connectors with flexible chair numbering. Apart from normal musicians’ chairs and teachers’ chairs, chairs with special height for children have been created. The entire orchestra equipment was also made by Kolberg: music desks with laser engraving, conductor’s desk, musicians’ chairs, transport carts and a purpose-built cart for percussion instruments.

“When building a music school, the orchestra equipment is obviously of particular importance. We relied on Kolberg Percussion’s many years of worldwide experience. Furthermore, Kolberg chairs are very popular among musicians because of their comfort and versatile adaptability – they have been perfectly adapted to the architectural requirements of the interior design.

Kolberg Percussion was the ideal partner for this project: very good advice, quality products and on-time production.

Wilford Schupp, architect

ORANGE BLU
building solutions

www.orangeblu.com

” The Kolberg chairs have lived up to our expectations in numerous ways. In an events establishment, it is essential to offer the artists the best possible infrastructure – the orchestra chairs play a special role in this regard. In our choice, we have attached particular emphasis to the musicians’ requirements and the quality of products – the positive feedback confirms our decision in favour of Kolberg.

Mag. Edgar Eller, managing director, Montforthaus Feldkirch GmbH

The new culture- and conference centre Montforthaus in Feldkirch/Austria was completed in late 2014 after a total of two years construction time, and inaugurated in January 2015.

BASIC EQUIPMENT UNIVERSAL

THE VERSATILE SOLUTION

With this basic equipment, you are perfectly prepared for all musical events in your municipal hall!

Whether small ensembles, wind orchestras or symphony orchestras – this equipment is guaranteed to delight musicians and promoters alike and you simultaneously upgrade your municipal hall.

Many promoters and musicians often complain of inadequate chairs, or missing specialist chairs for timpani, percussion and double-bass. They usually have to be provided by the orchestras themselves. The hall seating that is often used for musicians is generally poorly suited, because it isn't ergonomically designed for making music. Kolberg offers special musicians' chairs that are internationally prevalent and recognised.

The illustration shows the basic equipment Universal 50, which equips you for most events. For large municipal halls that can accommodate symphony orchestras, we recommend basic equipment Universal 70. In order to ensure that you are sufficiently equipped for your individual requirements, we'll be happy to advise you personally.

BASIC EQUIPMENT UNIVERSAL 50

- 50 x 3106_50 Orchestra chair (page 26)
- 3 x 3093 Double-bass stool, tiered foot rest (page 29)
- 2 x 3112 Timpani/percussion stool with foot rest (page 30)
- 1 x 3110 Timpani/percussion chair "Comfort" (page 29)
- 44 x MS4224 Music stand, aluminium (page 31)
- 6 x MS4224H Music stand, aluminium, for percussionists and bassists (page 31)
- 1 x 3026N Conductor's platform, wood (page 33)
- 1 x 4501 Conductor's music stand with 1 supporting tube (page 34)

BASIC EQUIPMENT UNIVERSAL 70

- 70 x 3106_50 Orchestra chair (page 26)
- 3 x 3093 Double-bass stool, tiered foot rest (page 29)
- 2 x 3112 Timpani/percussion stool with foot rest (page 30)
- 1 x 3110 Timpani/percussion chair "Comfort" (page 29)
- 62 x MS4224 Music stand, aluminium (page 31)
- 8 x MS4224H Music stand, aluminium, for percussionists and bassists (page 31)
- 1 x 3026N Conductor's platform, wood (page 33)
- 1 x 4501 Conductor's music stand, with 1 supporting tube (page 34)

Included in the price:
Fabric cover in Kolberg standard colours (see page 25). Desk bases and chair frames either chromed, or black powder-coated. Special colours and additional seating heights on request.

See page 41 for additional LED music stand lamps.

Product descriptions

of products included in the "basic equipment Universal" can be found on page 26.

TRAY PACKAGE

Desk trays are popular accessories for certain instrument groups, such as flutes. We therefore recommend fitting some of the desks with the desk tray 4243. The tray is entirely made of steel and thus extremely stolid, break-proof and resistant. The surface is covered with thick, anthracite-coloured needle felt.

TRAY PACKAGE 50

15 x 4243 Music stand tray, metal (page 31)

TRAY PACKAGE 70

20 x 4243 Music stand tray, metal (page 31)

BASIC EQUIPMENT COMPACT

THE SPACE-SAVING SOLUTION

The basic equipment compact is the ideal solution for establishments with little storage space. The desks 4224 intended therefore are true miracles of space saving. Due to the proven Kolberg stacking base, the optimised construction height and a special joint, the desk can be compactly stored within seconds. For the storage and transport of desks, we offer the transport- and storage cart 4224W for up to 75 desks. See page 18 for transport cart package compact.

With the exception of the special desks, the compact basic equipment corresponds to the universal basic equipment as described on pages 12 and 13.

BASIC EQUIPMENT COMPACT 50

- 50 x 3106_50 Orchestra chair (page 26)
- 3 x 3093 Double-bass stool, tiered foot rest (page 29)

EQUIPMENT PREMIUM CLASSIC DESIGN

The premium equipment is a very high-value equipment with our design classics made from wood; it has long become the standard at many opera houses and symphony orchestras.

Compared to the light and economic aluminium desks of the universal basic equipment, the premium equipment includes our very attractive desks made from multi-ply laminated beech wood that is especially manufactured for us. In combination with the very sturdy and stackable music stand bases 4125, you obtain the perfect desk. In addition, the premium equipment includes the larger, two-column conductor's music stand 4522. Chairs and conductor's platform correspond to the basic equipment universal, as described on pages 12 and 13.

PREMIUM EQUIPMENT 50

- (Chair's and Conductor's platform to basic equipment universal)
- 50 x 4210 Music stand (wooden desk) with music stand base 4125, thereof six desks in high version for percussionists and bassists (page 32)
 - 1 x 4522 Conductor's music stand with 2 supporting tubes (page 34)
 - 50 x 3106_50 Orchestra chair (page 26)
 - 3 x 3093 Double-bass stool, tiered foot rest (page 29)
 - 2 x 3112 Timpani/percussion stool with foot rest (page 30)
 - 1 x 3110 Timpani/percussion chair "Comfort" (page 29)
 - 1 x 3026N Conductor's platform, wood (page 33)

THE
CLASSIC
DESIGN

CONDUCTOR'S MUSIC STAND 4522

Our classic conductor's desk from multi-ply beech laminate with solid wood crosspiece and shelf tray area. The two standpipes and the desk foot with level control ensure a very solid position on stage.

You are looking for equipment that is specially adapted to the architecture of your hall? No problem – special colours and veneers can be provided on request. Please feel free to contact us.

Available in beech, as well as in black.

CHAIRS

The Kolberg name stands for a good sitting posture.

Our chairs stand in the most prestigious opera houses and concert halls worldwide. Many music schools, universities and municipal halls equip their concert halls with Kolberg chairs. For a good reason: Musicians' chronic back pain and muscular tension are often the result of uneven weight distribution of the spine when seated.

A good chair should prevent posture damage with ergonomically optimal sitting. Therefore our requirement for a musician's chair is that it can be individually adjusted to any physique and any sitting position with different adjusting options. Malpositions are thus prevented and your back remains healthy. We develop our products in close collaboration with orthopaedists, physiotherapists and, naturally, professional musicians. Health and comfort are our priority.

Please contact us – we'll be happy to advise you!

Klaus & Bernhard Kolberg, managing directors

+49 (0) 7161 / 3005-0

GENERAL QUALITY CRITERIA OF KOLBERG CHAIRS

- the experience of 40 years of chair production flows together
- only quality components are used in production
- each chair is produced by a skilled craftsman
- no sharp edges (visible or invisible)
- the frame of the chair is made of Ø 20 mm steel tube with 2 mm material strength
- the surface is either high gloss chromed, or black powder-coated
- all frames are fitted with stacking rails and black foot sliders made of black plastic

SEAT FORM "F" AND "S"

- standard form "F" with rounded front edge
- curved form "S" with rounded front edge and spine support
- rounded front edge helps prevent leg fatigue of the circulatory disorders
- the spine support prevents posture damage
- seating surface: Width x depth = 44 x 42 cm

F-Form

S-Form

SEAT CONSTRUCTION AND BACKREST

The seat rests on an elastic rubber suspension element. The seat shell and backrest are made of sturdy, multi-ply beech wood, upholstered with quality, air-permeable furniture foam, and fitted with ventilation holes.

The foam is 4 cm in thickness for the seat forms "F" and "S" (2,5 cm on request), and 6 cm for round seats.

The upholstery of the backrest is 3 cm thick. It is flexibly mounted onto the back rod and thus adapts to any posture.

FABRIC COVER

Seat and backrest are covered with a very sturdy upholstery fabric. The fabric is made of low flammability Trevira®-CS fabric:

Abrasion resistance
according to UNI EN ISO 12947-2:
100.000 Martindale rubs

Pilling
according to UNI EN ISO 12945-2: 5 = best mark (no pilling)

Light fastness
according to UNI EN ISO 105-B02: 6 = very good

Trevira® CS conforms to the following fire protection norms: UNI 9174-8456 Class C1, DIN 4102 Class B1, NF 92501-7 Class M1, CRIB 5, EN 1021/1-2, IMO Part 8 Upholstery, UNI 9175 Class 1 IM, BS 7176 Medium Hazard, NF D 60013 Class AM 18

Kolberg standard colours
Mottled: red, bordeaux, green, blue, anthracite
UNI: black

*We recommend the more soil-proof mottled colours.

ORCHESTRA CHAIRS

3105
Orchestra/harp chair
"Comfort"

Seat height:
42 - 55 cm
50 - 70 cm in high version 3105H
fluid height adjustment via pneumatic mechanism with release lever
Adjustment: fluid inclination adjustment up to 20° via knurled screw
Seat shape: standard
Seat: fixed, non-swivelling
Backrest adjustment: fluid adjustment of height via knurled screw, fluid adjustment of inclination via pneumatic mechanism with release lever.
Base: five-legged base with pneumatic spring, high-gloss chrome-plated
Weight: 9,5 kg

3111
Orchestra chair "Comfort", high

Seat height:
50 - 70 cm
pneumatic continuously adjustable
Adjustment: Inclination continuously adjustable by 20° via an excentric quick-release fastener
Seat shape: standard "S" = S-shape; or optionally "F" = flat
Seat: fixed, non-swivelling
Backrest adjustment: Height continuously adjustable via a handwheel screw
Base: five-legged base with pneumatic spring, high-gloss chrome-plated
Foot rest: triangular, high-gloss chrome-plated, fluid height adjustment, swivelling
Weight: 11,5 kg

3090
Double-bass chair "Comfort"
with two adjustable foot rests

Seat height:
68 - 81 cm
73 - 93 cm in high version 3090H
fluid height adjustment via pneumatic mechanism with release lever
Adjustment: Inclination continuously adjustable by 20° via an excentric quick-release fastener
Seat shape: "F" shape with rounded right-hand-side front edge
Seat: fixed, non-swivelling
Backrest adjustment: fluid adjustment of height via knurled screw, fluid adjustment of inclination via pneumatic mechanism with release lever.
Base: 4-foot with pneumatic column and two floor brackets, high-gloss chromed. The reinforcement stabilises the frame and simultaneously serves as an additional footrest.
Foot rest: two variable footrests, continuously height adjustable, swivel-mounted; rotating tread area
Weight: 12,9 kg

3093
Double-bass stool, travelling
model, tiered foot rest

Seat height:
72 - 85 cm
fluid height adjustment with clamping lever
Seat: non-swivelling due to keyway system, removable
Seat shape: round, Ø 30 cm
Base: four-legged base, high-gloss chrome-plated; the stabilising centre ring acts as an additional foot rest
Foot rest: threefold tiered foot rest
Stackability: without seats up to 6 frames can be stacked, free-standing
Weight: 7,7 kg

MUSIC STANDS

MS4224

Music stand, aluminium

Desk: sturdy, lightweight aluminium plate
Sheet music surface: width x height = 50 x 33 cm
Stand height:
ca. 65 - 115 cm with 60 cm insert tube
ca. 70 - 135 cm with 80 cm insert tube MS4224H
Desk angle: fluid adjustment up to 180° by means of a secure friction clamping element
Insert tube: Ø 16 mm
Stand base: vertical supporting tube Ø 20 mm, basic height 70 cm
Stackable base: The proven Kolberg Stackable base allows for very compact nesting and space-saving storage of music stands.
Colour (Desk/Stand base):
black powder-coated/black powder-coated or high-gloss chrome-plated
Weight: 2,8 kg
Accessories: Sliding shelf elements 4220A for music stand desk

4224

Stackable music stand, aluminium, "Compact"

Desk: sturdy, lightweight aluminium plate
Sheet music surface: width x height = 50 x 33 cm
Stand height:
ca. 46 - 90 cm
ca. 95 - 130 cm with adapter tube 4224H (e.g. for double-bass players)
Desk angle: fluid adjustment up to 180° by means of a secure friction clamping element
Insert tube: Ø 16 mm
Stand base: vertical supporting tube Ø 20 mm, basic height 47 cm
Stackable base: The proven Kolberg Stackable base allows for very compact nesting and space-saving storage of music stands.
Colour (Desk/Stand base):
black powder-coated/black powder-coated or high-gloss chrome-plated
Weight: 2,5 kg
Accessories: Sliding shelf elements 4220A for music stand desk

4243

Music stand tray, metal

Dimensions: 40 x 12 cm
Fixture: clamp-on holder, suitable for tube diameters 16 - 30 mm
Colour: black powder-coated
Weight: 0,9 kg
Thanks to its steel construction, this model is strong, break-proof and can withstand rough treatment. A layer of thick, black needle felt is glued to the contact surface.

4242

Music stand tray, wood

Dimensions: 40 x 12 cm
Fixture: clamp-on holder, suitable for tube diameters 16 - 30 mm
Colour (wooden surface/square tube):
copper beech natural/high-gloss chrome-plated or black/black powder-coated
Weight: 1,1 kg
The very sturdy tray made of multi-ply beech wood is firmly screwed to a T-shaped square tube. The contact surface is padded with thick, black needle felt.

For a surcharge, the desk tops for music stands 4224, MS4224 and MS4224H are available in all RAL classic colours A one-off payment of 100 Euros per order is charged for your colour, no matter how many desks you order from us.

Matching transport carts, see p. 38

4244

Flute tray, wood, large

like music stand tray 4242, but larger and with a thicker padding.
Dimensions: 60 x 15 cm
Weight: 1,7 kg

MUSIC STANDS

Premium equipment

4210

Music stand desk, wood

Desk: Multi-ply beech wood with solid wood shelf
Sheet music surface: width x height = 55 x 37 cm
Height (depending on the base):
 ca. 65 - 110 cm with 60 cm insert tube
 ca. 85 - 130 cm with 80 cm insert tube ROHR80
Desk angle: fluid adjustment up to 105°
Insert tube: Ø 20 mm
Colour (desk/insert tube): copper beech natural/high-gloss chrome-plated or black/black chrome-plated
Weight: 2,6 kg
Recommended music stand bases: 4125, 4125S

4230D

Music stand desk, synthetic material, with double shelf

Desk: the sheet music surface and shelves are made of extremely break- and shock-proof synthetic material with wood graining structure. The double shelf with its integrated pencil groove serves as a useful storage niche. The sheet music surface remains the same (height music stand desk: 42 cm).
Sheet music surface: Width x height = 55 x 37 cm
Height (depending on the base):
 ca. 65 - 110 cm with 60 cm insert tube
 ca. 85 - 130 cm with 80 cm insert tube ROHR80
Desk angle: fluid adjustment up to 105°
Insert tube: Ø 20 mm
Colour (desk/insert tube): copper beech natural/high-gloss chrome-plated or black/black chrome-plated
Weight: 3,2 kg
Recommended music stand bases: 4125, 4125S

4125

Music stand base, stackable

Ideal for all music stand desks with insert tube Ø 20 mm.
Vertical tube: Ø 25 mm, basic height 70 cm
Colour: high-gloss chrome-plated or black powder-coated
Weight: 1,7 kg

4125S

Music stand base, stackable, heavy

A steady base for music stands with lighting, instrument or mute holders. It is also ideal for stands with telescopic insert tubes for performing when standing. Suitable for all music stand desks with insert tube Ø 20 mm.

Vertical tube: Ø 25 mm, basic height 70 cm
Colour: high-gloss chrome-plated or black powder-coated
Weight: 4,2 kg

You can find additional desk feet under www.kolberg.com

You can find suiteable transport carts for our music stands on page 38.

CONDUCTOR'S PLATFORMS

Basic equipment
universal + compact
Premium equipment

3026N

Conductor's platform, wood

Dimensions: 100 x 100 cm
Platform height: 22 cm by means of four plug-in legs with level adjustment
Frame and tread surface: very sturdy frame construction of solid wood and multi-ply beech wood. The wood-core plywood tread surface is covered with hard-wearing carpeting to absorb the sound of footsteps.
Colour of carpeting: anthracite
Rail: steel tube, removable. Secure, permanently sound-free mounting.
Colour (Platform/Rail): Natural copper beech, varnished silk-matt/high gloss varnished or black, varnished silk-matt/powder-coated
Weight: 31 kg
Accessories: Auxiliary step for conductor's podium 3026N (recommended from a base height of 40 cm)

3010

Conductor's platform, metal

Dimensions: 100 x 100 cm
Platform height: thanks to the special design of the four solid steel plug-in legs with level adjustment, the platform can be set up at a height of 15, 30 or 38 cm.
Frame and tread surface: the sturdy wood-core plywood tread surface is mounted on a steel frame. The borders are protected by profiled angles and rounded edge covers. The tread surface is strengthened by a cross bar underneath and covered with a hard-wearing carpet to absorb the sound of footsteps. In order to prevent resonance sounds, the contact surfaces between frame and tread surface are felt-covered.
Colour: black-silver powder-coated
Colour of carpeting: dark anthracite
Rail: high-gloss chrome-plated steel tube, removable. Secure, permanently sound-free mounting. Further rail shapes upon request.
Transport: the plug-in legs and rail can be detached and securely attached to the underside of the platform for transport.
Weight: 41 kg

3010S

Additional step for conductor's platform 3010

Tread surface: width x depth = 92 x 25 cm, covered with hard-wearing carpeting to absorb the sound of footsteps. Colour of carpeting: dark anthracite
Step height: 18 cm
Weight: 7 kg
 This sturdy wood-core plywood tread surface can be easily and swiftly attached. The clamps and rubber buffers ensure stability. Profiled angles and rounded edge covers protect the borders.
 We also offer individually-tailored solutions adapted to the use intended and to particular local conditions.

CONDUCTOR'S PLATFORMS

Premium equipment

Basic equipment
universal + compact

4512

Conductor's music stand, medium,
with 2 vertical supporting tubes

Music stand desk (sheet music surface) and score tray: 70 x 45 cm, multi-ply beech wood with solid wood shelves, satin finish

Music stand base: sturdy, stable frame crafted from steel tubing with four adjustable rubber buffers for level adjustment, vertical tube Ø 25 mm, basic height 55 cm

Music stand height: fluid adjustment
ca. 75 - 115 cm with 60 cm insert tube
ca. 95 - 135 cm with 80 cm insert tube ROHR80

Insert tube: Ø 20 mm, black or high-gloss chrome-plated

Desk angle: fluid adjustment

Colour (music stand desk/music stand base): copper beech natural/high-gloss chrome-plated or black/black powder-coated

Weight: 10,6 kg

4522

Conductor's music stand, large,
with 2 vertical supporting tubes

Music stand desk (sheet music surface) and score tray: 80 x 50 cm, multi-ply beech wood with solid wood shelves, satin finish

Music stand base: sturdy, stable frame crafted from steel tubing with four adjustable rubber buffers for level adjustment, vertical tube Ø 25 mm, basic height 55 cm

Music stand height: fluid adjustment
ca. 75 - 115 cm with 60 cm insert tube
ca. 95 - 135 cm with 80 cm insert tube ROHR80

Desk angle: fluid adjustment

Colour (music stand desk/music stand base): copper beech natural/high-gloss chrome-plated or black/black powder-coated

Weight: 11,8 kg

4501

Conductor's music stand, small,
with 1 vertical supporting tube

Music stand desk (sheet music surface) and score tray: 60 x 40 cm, multi-ply beech wood with solid wood shelves, satin finish

Music stand base: five-legged, vertical tube Ø 25 mm, basic height 63 cm (like music stand base 4105)

Music stand height: fluid adjustment
ca. 85 - 120 cm with 60 cm insert tube
ca. 105 - 140 cm with 80 cm insert tube ROHR80

Insert tube: Ø 20 mm, black or high-gloss chrome-plated

Desk angle: fluid adjustment

Colour (music stand desk/music stand base): copper beech natural/high-gloss chrome-plated or black/black powder-coated

Weight: 8,2 kg

4511

Conductor's music stand, medium,
with 1 vertical supporting tube

Music stand desk (sheet music surface) and score tray: 70 x 45 cm, multi-ply beech wood with solid wood shelves, satin finish

Music stand base: five-legged, vertical tube Ø 25 mm, basic height 63 cm (like music stand base 4105)

Music stand height: fluid adjustment
ca. 85 - 120 cm with 60 cm insert tube
ca. 105 - 140 cm with 80 cm insert tube ROHR80

Insert tube: Ø 20 mm, black or high-gloss chrome-plated

Desk angle: fluid adjustment

Colour (music stand desk/music stand base): copper beech natural/high-gloss chrome-plated or black/black powder-coated

Weight: 9,2 kg

4560

Conductor's music stand,
extendable, with halogen lamp

Music stand desk: multi-ply beech wood with solid wood shelf, satin finish; fluid and easy extension to the left and right by means of sturdy aluminium slide bars

Sheet music surface:
Width x height = 55 - 100 x 37 cm

Score tray: 55 x 38 cm, multiply beech wood with solid wood shelves, satin finish

Music stand base: five-legged, vertical tube Ø 25 mm, basic height 63 cm (corresponds to music stand base 4105)

Music stand height: fluid adjustment
ca. 85 - 120 cm with 60 cm insert tube
ca. 105 - 140 cm with 80 cm insert tube ROHR80

Insert tube: Ø 20 mm, black or high-gloss chrome-plated

Desk angle: fluid adjustment

Colour (music stand desk/music stand base): copper beech natural/high-gloss chrome-plated or black/black powder-coated

Music stand lamp (4320HDT-230): for description please refer to the page 41

Weight: 11,5 kg

The conductor's music stand is also available without the halogen lamp (at reduced price).

ALSO AVAILABLE
AS LED VARIANT!

4550

Conductor's music stand, model for theatre,
different model

Music stand desk: 90 x 60 cm, multi-ply beech wood, black silk-matt varnish
Sheet music surface: ca. 65 x 45 cm

Music stand base: sturdy, stable frame crafted from steel tubing, black powder-coated, with four adjustable rubber buffers for level adjustment and drillings, so that the base can be bolted onto the floor.

Music stand height: various designs

Desk angle: adjustable up to 10°

Illuminant: Linestra® lamp or LED, continuously dimmable directly at the desk

Connection: directly to 230 V mains supply

Equipment: dimmer, 3 m cable, moulded plug (CEE 7/17) and illuminant

Reversible mat: black/anthracite from quality needle felt

Our multifunctional conductor's desks are also ideally usable as speaker's lecterns!

Kolberg has developed a high-tech conductor's desk for Moscow's Bolshoi Theatre. The result is a conductor's desk with fully digital control of podium height, desk height and desk inclination, with 5 memory positions.

CONDUCTOR'S CHAIRS

3110D

Conductor's and director's chairs "Comfort"

Seat height:

58 - 84 cm

fluid height adjustment via pneumatic mechanism with release lever

Adjustment: fluid inclination adjustment up to 20° via knurled screw

Seat shape: standard "S" = S-shape; or optionally "F" = flat

Seat: fixed, non-swivelling; optionally swivelling: 3110 R

Backrest adjustment: fluid adjustment of height via knurled screw, fluid adjustment of angle via pneumatic mechanism with release lever

Base: five-legged base with pneumatic spring, high-gloss chrome-plated

Foot rest: triangular, high-gloss chrome-plated, fluid height adjustment, swivelling

Weight: 11,8 kg

Accessories: full-circle foot rest Ø 43 cm (3110F43) or Ø 60 cm (3110F60), high-gloss chrome-plated

3114D

Conductor's chair with platform "Comfort"

Seat height:

54 - 74 cm (from tread surface),

74 - 94 cm (from floor)

pneumatic mechanism with release lever

Adjustment: fluid inclination adjustment up to 20° via knurled screw

Seat shape: standard "S" = S-shape; or optionally "F" = flat

Seat: fixed, non-swivelling, optionally swivelling: 3114DD

Backrest adjustment: fluid adjustment of height via knurled screw, fluid adjustment of inclination via pneumatic mechanism with release lever

Frame: steel tubing design with a vertical tube for pneumatic spring, black powder-coated

Platform height: 20 cm, other heights available on request

Tread surface: width x depth ca. 50 x 30 cm, other dimensions on request

Weight: 15,7 kg

This model enables the conductor to work in an optimum position, standing or seated. The chair is equipped with a comfort seat and pneumatic height adjustment. Seat height, seat inclination, backrest height and angle can be adapted to every individual body build and posture.

3106D

Conductor's standard chair

Seat height:

80 cm

Adjustment: none (fixed frame)

Seat shape: standard "S" = S-shape; or optionally "F" = flat

Frame: steel tubing design (Ø 20 mm, 2 mm wall thickness) with a cross bar as foot rest; black

Weight: 9 kg

You can always rely on us after your purchase. We offer competent, reliable and fast customer service, especially for durable products under significant strain. Qualified service is the best guarantee for value retention.

TRANSPORT CARTS

Transport cart packages
universal, compact +
premium

3135

**Transport- cart for music stands
and chairs, long**

Equipment: platform model made from aluminium safety plate, push-handle of steel tubing, two brake swivel casters and two fixed rollers, all with a diameter of 80 mm, with solid rubber tread (optionally, the cart can be fitted with four brake swivel casters)
Exterior dimensions: length x width = 182 x 53 cm
Weight: 21 kg

Variant: transport cart, short (length x width = 110 x 53 cm) 3135 D, for a maximum of 16 Kolberg orchestra chairs (e. g. model 3106)

Stackable platform transport cart with edge guides for up to 18 Kolberg orchestra chairs (e. g. model 3106), or 20 Kolberg desks model MS4224, or 12 Kolberg desks model 4210 with stacking foot 4125.

The transport cart can be individually adapted to requirements and spatial conditions (e. g. lifts). Please feel free to contact us.

Transport cart packages
compact

4224W

**Transport- and storage cart for
music stands 4224**

Dimensions (height x width x length): ca. 180 x 57 x 168 cm
Volume: 1,8 m³ with 75 desks
Colour: black-silver powder-coated
Weight: 46 kg
Sturdy, compact transport- and storage cart made of aluminium, with three levels for up to 75 stackable desks, model 4224. With a base area of less than one sqm, this is a very space-saving option for the storage and transport of desks! The transport cart can be individually adapted to requirements and spatial conditions (e. g. lifts). A flight case can be delivered for travel. A variant with two levels is also possible (height including desks ca. 120 cm). Two brake swivel castors and two fixed castors enable a smooth run and secure braking of the transport cart. The transport- and storage cart is also available with four brake swivel castors on request.

3138

Hand truck for chairs

2-wheel hand truck with solid rubber tyres. Welded steel tubing structure for a maximum of 8 Kolberg orchestra chairs (depending on model). The height of the carrying arms can be adjusted to suit the model of chair being transported.
Colour: black powder-coated
Weight: 16,5 kg

3135K

**Transport cart with anti-tilt protection for
music stands**

like transport cart 3135, but with additional anti-tilt protection for music stands.

Exterior dimensions: length x width= 187 x 53 cm
Weight: 27 kg

Accessories: anti-theft device for music stands 3135 DP

The platform of the cart features two clamps which can be swiftly and easily slipped over the bases of the music stands to protect them against tilting over during transport. We recommend this model if long, uneven stretches have to be negotiated when transporting the music stands.

Anti-theft device for stacked chairs upon request.

MS4220R-50

**Music stand, aluminium,
travelling model**

Desk: light, sturdy aluminium plate with sliding quick lock
Sheet music surface: (width x height): 50 x 33 cm
Desk angle: fluid adjustment up to 180° by means of a secure friction clamping element
Stand height: ca. 55 - 112 cm
Stand base: steel/high gloss chromed, collapsible
Colour (music stand desk): black powder-coated
Weight: 3,1 kg

Desk tops are available in all RAL classic colours for a surcharge.

**Flight cases
for music stands MS4220**

Sturdy, stackable flight cases with an interior designed to accommodate up to 20 dismantled travelling music stands (music stand desk 4220 R-50 and music stand base 4136, travelling model). If the cases have to be carried, we recommend loading no more than 15 music stands.

4220FCR

Flight case with casters

Dimensions (height x width x depth): 60 x 75 x 47 cm
Weight, empty: 24 kg
Weight with 15 music stands: 72,5 kg
Weight with 20 music stands: 88 kg

4220FC

Flight case without casters

Dimensions (height x width x depth): 52 x 75 x 47 cm
Weight, empty: 20,5 kg
Weight with 15 music stands: 68,5 kg
Weight with 20 music stands: 84,5 kg
Packed size for 80 desks in 4 flight cases: 2 x flight cases with casters 4220 FCR + 2 x flight cases without casters 4220 FC
Dimensions (height x width x depth): ca. 110 x 75 x 95 cm
Volume: 0,8 m³

In order to save space, we recommend taking two crates with, and two crates without castors. In this way, you obtain a convenient stacking combination.

LESS THAN
1 m²
FOR 80 DESKS

You only have extremely little storage space?

With the combination shown here, you can store 80 desks on less than one sqm, and transport them conveniently!

LIGHTS

Package desk illumination

4310AH LED music stand lamp "Bright"

The LED music stand lamp "Bright" (4310AH) is convincing with a sturdy construction and reaches high brightness thanks to its 10 LEDs with up to 280 lux. Three AA batteries provide energy for the lamp for up to 15 hours.

- neutral white light with high contrast
- 10 bright and efficient LEDs, switchable to 2 brightness levels
- flexible adjustment thanks to two 22 cm long swan-necks
- suitable for battery- and mains operation
- incl. power adapter, bag, batteries (3 x 1,5 V AA)

Graduate engineer Christian Brauer,
head of development department

In order to be able to offer you a choice of the best lamps, Kolberg Germany has exhaustively tested all relevant LED musician's lamps within the price range of under 70 Euros. In doing so, testing was carried out both technically, by our electrical engineer, and in terms of practical suitability, by experienced musicians.

The desk lamps 4310AH and 4320KM emerged as our favourites amongst a great number of test candidates.

4320KM LED music stand lamp "Duo"

The LED music stand lamp 4320KM reaches up to 270 lux with a total of eight LEDs. Thanks to the two-tier construction, illumination is very conveniently adjustable; depending on the position, 180 lux can be reached even at the outer edge of the desk. Three AA batteries provide energy for the lamp for up to 14 hours.

- neutral white light with high contrast
- Light heads are individually switchable
- very flexible adjustment thanks to two 25 cm long swan-necks
- suitable for battery- and mains operation
- incl. power adapter, bag, batteries (3 x 1,5 V AA)

ALSO AVAILABLE AS LED VARIANT!

4320HS Music stand twin lamp, halogen 24 V

Illuminant: two 20 W halogen lamps, G4 base, 775 Lux
Voltage: 24 V, for connection to 24 V main transformer; blackout capability
Equipment: cable switch, 3 m cable (without plug), bulbs
Colour: black powder-coated

4320HF Grand piano/harpsichord lamp holder

Can hold all Kolberg lamp models. The lamp holder can simply be mounted on the instrument stand without leaving a single mark on the valuable brilliant varnish. This is guaranteed by the innovative design, in which both adjustable screws press on a spring plate holding the holder fast. The inner side is felt-covered.

ALSO AVAILABLE AS LED VARIANT!

4320HDT-230 Conductor's music stand twin lamp, halogen 230/12 V

Illuminant: two 20 W halogen lamps, G4 base, 775 Lux
Voltage: 12 V, for direct connection to 230 V mains supply; no blackout capability
Equipment: individual cable transformer, 230 /12 V with dimmer, 3 m cable, moulded plug (CEE 7/17), bulbs
Colour: black powder-coated
The conductor's music stand lamp can be easily adjusted to every desired position thanks to the two tilting joints of its main arm, even when large music scores are placed on the desk.

4311DLS LED free-standing lamp Stoccarda

Please see page 42-43 for a detailed description.

LED DESK LAMP FOR PROFESSIONAL ILLUMINATION IN THE ORCHESTRA PIT

LED music stand lamp 4320DLS
Our LED desk lamp 4320DLS was especially developed for the optimal illumination of music desks. Both slim and sturdy, the lamp powder-coated housing made of tubular steel ensures longevity under tough orchestra conditions.
From a technical point of view, the lamp impresses with numerous different operating modes Phase-controlled, with local brightness regulator, digitally per DMX-RDM, or via radio signal. The lamp can be powered by AC voltage, DC voltage, mains adapter, main transformer or by mobile power pack.

Awarded the Innovation Prize of
the District of Göppingen, 2015

LED FREE-STANDING LAMP

Stoccarda

for keyboard
instruments
and percussion

LACK OF LIGHT?

Illumination for keyboard instruments is often suboptimal in the orchestra pit. Problems usually start to appear when mounting the lamp to the instrument, because the different designs of the instruments do not allow for a standardised mount to be used. Unsatisfactory solutions that do not live up to the requirements of the orchestra pit are often implemented out of necessity.

NO MORE COMPROMISES

With the LED free-standing lamp Stoccarda, you no longer have to accept any compromises. It illuminates both keyboard and score perfectly.

- suitable for all keyboard instruments, as its height and depth are also adjustable
- flat foot for instruments with limited ground clearance, such as celesta and keyboard chimes
- collapsible for transport or storage
- sturdy design for everyday orchestra use
- unobtrusive design
- available with wheels on demand and for a surcharge (Item no. 4311DLSR)
- perfect LED light with very high lighting quality (CRI 95)
- dimmable via phase control (24 volt AC, 230 volt AC with power supply 4315DLSNTK)
- dimmable via DC voltage
- can be dimmed locally, in addition to central dimming
- fully compatible with the Kolberg LED programme (e. g. power pack and supplementary modules)

VERSATILE

The easy handling and unobtrusive design of the LED free-standing lamp Stoccarda enables versatile use of the lamp in the orchestra pit. The illumination of the music desks for percussion instruments, for example, is often inadequate in terms of illuminating drumsticks, small instruments or the timpani tuning scale. This is no longer a problem with the LED free-standing lamp Stoccarda. The free-standing lamp provides light where it is needed.

DEVELOPMENT

“After successfully converting the orchestra lighting to modern LED lamps, it was clear that the workarounds illuminating the keyboard instruments also had to finally be replaced by a professional solution. After years of positive experience with Kolberg’s orchestra illumination, the obvious choice was to develop the perfect solution together. The requirements were a large adjustment range for the desk in use with all keyboard instruments, flexible adaptability of the illuminants, as well as a low level of stray light while offering broad illumination of score and keyboard. Not least, the lamp had to be dimmable in conjunction with the LED music desk lamps, without additional technology.

Actually, the final product that Kolberg presented to us even surpassed our expectations. The illumination of the keyboard is perfect, and even large scores are optimally illuminated.

Due to the great flexibility, we are now finally in a position to master other challenges with regard to lighting the orchestra pit. Due to its compatibility with the existing technology, the lamp was immediately operational. We currently deploy three free-standing lamps in the orchestra pit.”

*Thomas Bäurle, Managing Director of the
Staatsorchester Stuttgart*

“THE FREE-STANDING
LAMP BY KOLBERG HAS
EVEN SURPASSED OUR
EXPECTATIONS!”

CURIOUS?

We’d be happy to send you a sample without obligation. Please provide the following information in case of an enquiry:

- Which supply voltage is available in the orchestra pit?
- Which plug connection is in use?
- Is the lamp also intended for use at 230 volt?

TECHNICAL DATA

Measurements (L x B x H in cm)	minimum: 115 x 64 x 95 maximum: 140 x 64 x 160
Operating voltage	from 14 V DC to 19 V DC and from 22 V AC to 28 V AC
Power consumption	15 W at full brightness
Lighting intensity	maximum of 1400 Lux at a distance of 35 cm
Colour temperature	3000 K
CRI-value	95
Lighting duration in battery mode	min. 10 h of illumination with our 100 Wh Li-Ion power pack
Connection plug	5-pole XLR black
Energy efficiency class	A+ (15 kWh per 1000 h)

ACCORDING TO ALL THE RULES!

For Kolberg a matter of course! Our lamp complies with all legal requirements, including for electromagnetic tolerance. Just to be on the safe side, our products are tested by an independent test lab for interference emission according to DIN EN 55015 and DIN 61000-6-3 (limit class B, living area), as well as for interference resistance according to DIN 61000-6-2 (deployment in industrial environments). The future is also insured. We take the legal requirements regarding the disposal and recycling of electrical appliances into consideration and are registered with the Foundation for Electronic Waste (Elektro-Altgeräte Register, EAR). Sustainability and ecological responsibility – we take on this challenge!

ABOUT US IN THE PRESS

SOCIETY

Setting the tone from Uchingen Kolberg Percussion equips opera houses worldwide

Milan's Scala, Bolshoi Theatre Moscow, Semper Opera House Dresden, or the Sidney Opera – they are all linked by one thing with Uchingen in the district of Göppingen, namely percussion instruments and orchestra equipment by Kolberg. The products and custom-made designs by the family business from the Fils Valley are part of "good tone" for the most celebrated musicians and conductors.

KOLBERG
GERMANY

They offer a lot for the eardrum: Klaus (left) und Bernhard Kolberg

In its showrooms measuring some 1000 sqm, Kolberg-Percussion shows all that rattles, clatters, chimes or whistles: kettle drums with gleaming copper kettles, huge drums, gongs with a diameter of up to one and a half metres, xylophones, triangles, rattles, bells, glass bottles. The visitor is itching to just start drumming here or there. "Just have a go", junior-manager Klaus Kolberg encourages the visitor.

Percussion instruments have been developed and produced in the family business since 1968. Company founder Bernhard Kolberg initially completed training to become a mechanical engineering technician, but had been a passionate musician and percussionist from childhood. That's why he enrolled at the Stuttgart conservatory after tech-

nical training and played in various symphony orchestras. "The postwar years, however, were characterised by shortages, there were hardly any useful accessories for percussionists", Klaus Kolberg relates. In the best tradition of the Swabian tinkerer, Bernhard Kolberg remembered his technical know-how and reflected on how to meet his musical requirements. To this day, the venerable boss constantly pores over new ideas and improvements, whether it's about drumsticks or drum mechanics, instrument mounts or orchestra chairs. "We can bridge the gap between the traditional craft businesses on the one hand, and the technology company on the other", Klaus Kolberg says. This becomes apparent during the tour of the production halls

measuring 6000 sqm. While resonant wood is processed into a marimbaphone in the joinery, a laser cutter is cutting components for orchestra chairs in the metalworks. Drumsticks are covered in felt in the sewing workshop, while glare-free LED lamps for music desks are assembled next door. "We have invested almost two years in the development of this lamp, but it is full of innovations as a result", the head of the company explains. Fine tuning of the instruments takes place at the in-house sound studio. About 25 employees - most of them play an instrument themselves - work at the company. "We are constantly on the lookout for qualified specialists", Klaus Kolberg says.

The Uchingen Company delivers not just percussion instruments, such as the tin drum used in the eponymous film by Volker Schlöndorff, which was awarded an Oscar, but it is also one of the leading manufacturers of orchestra equipment. "Our showpiece is a conductor's desk for the Bolshoi Theatre in Moscow", Klaus Kolberg reveals. The high-tech contraption was developed especially for that theatre and can be electronically adjusted in all directions. The unique feature: up to five conductors can save their individual configuration.

Interplay of rosewood and aluminium: a marimbaphone.

Before the drumstick comes the hammer: Copper processing in production.

Information

Additional information regarding the company can be obtained on the internet under www.kolberg.com

"If a worldwide soundscape existed, its navel would be located in Uchingen, because instruments travel from here to all notable symphony orchestras around the globe, from Auckland to Zurich. Kolberg Percussion GmbH is amongst the premier providers of percussion instruments and orchestra equipment. Most of the things that thunder, pulsate, clap or rattle in the great musical masterpieces come from this manufactory. These instruments sound not only in the pit, but also on the radio and in film scores."

Angelika Stehle
"wertsicht" - magazine 1-2015

Jasmin Kolberg

www.jasmin-kolberg.com

"Music aficionados don't like to buy from a catalogue. That's why many discerning musicians, composers, conductors and directors come directly to Uchingen in order to listen to the instruments live, and to test the chairs, music desks and conductor's podiums for orchestra equipment themselves. Company founder Bernhard Kolberg himself has sat in prestigious orchestra pits and knows many famous contemporary musicians personally. His son Klaus, who co-manages the business, grew up between timpanis and scores, and plays the piano and percussion. His sister Jasmin has made a name for herself as a gifted marimbist and represents the business in this way."

Angelika Stehle
"wertsicht" - magazine 1-2015

"During his years of learning and wandering, the company founder did not just train to become a mechanical engineering technician. He subsequently studied percussion at the Stuttgart conservatory and commenced an apprenticeship with the Zurich master craftsman for drums Eugen Giannini. During his studies, he already invented an arrangement of stands for percussion instruments and accessories that is unique to this day and that works according to a modular design."

Angelika Stehle

YOUR NOTES

- Our business hours are: Monday - Thursday: 8 am - 5 pm;
Friday: 8 am - 4 pm and by appointment.

Nowadays many manufacturers advertise amazing discounts. However, as the initial price is nowhere to be found, or fictitious, nobody knows at the end of the day whether he has effectively received a discount. We have only one price for all customers worldwide, and one can look it up on the internet. Trust our price-performance ratio: Thanks to their longevity, quality Kolberg products are ultimately the most advantageous alternative!

We have counted on direct sales from professional to professional from the beginning. This means that in-house products by Kolberg Percussion are not available in retail, but are only delivered directly ex factory from Ugingen. This offers the customer the advantage of staying in direct contact with us as manufacturer. Repeat orders or accessories can be delivered trouble-free, even years later.

Only for commercial use.

Shipping and payment

We grant payment terms within Germany, but require advance payment for all other countries. Products that are in stock are dispatched on the following business day at the latest, and, in the case of Germany, usually delivered the following business day. Of course we can arrange for express shipment. Our service partner UPS delivers our parcels speedily and reliably.

Some of our products are manufactured to suit the customer's requirements, or order-related.

Delivery times from our production at the Uhingen plant are empirically very short. We're happy to provide you with a non-binding offer, which will include the delivery time for the required product.

Warranty and Kolberg goodwill

If you have a problem with a product after expiry of the statutory warranty period, the Kolberg goodwill may apply. We know our products very well and can therefore determine whether a material fault, impeding proper use, is present, for example. If we can exclude improper or excessive use, the Kolberg goodwill applies. In this case, we will send you the appropriate spare parts, or repair the product on our premises. In this case, please send the product to us carriage-paid.

Return / exchange

According to statutory regulations, there is no right of cancellation for institutions and commercial customers. However we want satisfied customers. Should you ever be dissatisfied with your Kolberg product, contact us and we will look into the issue.

We reserve the right to modify prices and designs without prior notice.
We cannot accept liability in case of typographical errors.

Product illustrations may vary from the original, potential colour deviations occur as a result of printing.

Thanks to the town of Ugingen

We would like to thank the city of Ugingen, which has kindly put the Uditorium at our disposal for our photo shoot.
